Usage guide for
the demonstration
platforms of the
**IPBRICK MAGIC
WALL** solutions

The demonstrations of the IPBRICK solutions allow you to test the solutions that integrate the **IPBRICK MAGIC Wall**

IPBRICK.CAFE – Enterprise Social Network

IPBRICK.UCoIP – Unified Communications over IP

IPBRICK.MAIL – Email and Collaborative Tools

iPortalDoc – Document and Process Management

MAGICWALL

You can ask for a test account to test the solutions of IPBRICK through the websites of **IPBRICK** or **iPortalDoc**, by filling the available forms, or you can simply send an email to **marketing@ipbrickdi.com** with the request in question.

Instructions

1. Access to the websites of IPBRICK **www.ipbrick.com** or iPortalDoc **www.iportaldoc.pt/en**
2. Select the tab of the solution that you wish to test
3. Click on the button "Ask for a test account"
4. Fill the form
5. Wait for the email with the instructions to access

How to access the demonstration platform

After receiving an email with the access credentials, you must follow the instructions provided in the email. Please watch the small video that accompanies the email.

The access is made via **https://cafe.ucoip.net**, regardless of the solution you wish to test.

Available videos on the IPBRICK Solutions

IPBRICK Magic Wall - Enterprise Communications Solutions

With IPBRICK Magic Wall your company may have solutions that cover: Enterprise Social Network, Document Management and Processes, Unified Communications and Email & Groupware, with a high level of integration.

IPBRICK.CAFE

The **Enterprise Social Network,** integrated with the Unified Communications **(voice, video, email and professional chat)**, is the access door to all IPBRICK applications.

IPBRICK.CAFE

It's a **private** and **secure** space that helps companies reduce the number of emails (received and sent), since it allows them to **exchange ideas, discuss projects** or even **make joint decisions** through the social area available in the main interface of the solution.

IPBRICK.CAFE

To watch more videos, consult the IPBRICK.CAFE **playlist** on IPBRICK YouTube channel.

▶ Watch Video Presentation

IPBRICK.UCoIP

IPBRICK.UCoIP is a **Unified Communications center**, that has no limit of users or phone extensions, and operates in **Private Cloud.**

IPBRICK.UCoIP

Since the communications center includes **Voice, Videoconference and Professional Chat,** duly integrated with Email, it is capable to use the Email address as a common address (UCoIP address) to easily communicate through the communication channels available. It also provides a UCoIP page that allows any user, who is external to the organization, whether it's a partner or client, to contact you through **Voice, Video, Email and Professional Chat.**

To watch more videos, consult the IPBRICK.UCoIP **playlist** on IPBRICK YouTube channel.

▶ Watch Video Presentation

IPBRICK.MAIL

The **Email and Collaborative Tools** solution of IPBRICK ensures you a secure access and an effective management of the **email account** as well as of **contacts, calendars, tasks and notes.**

IPBRICK.MAIL

It's also important to stand out the **integration** of the **email** solution with the **Document and Process Management.**

IPBRICK.MAIL – Email and Collaborative Tools

To watch more videos, consult the IPBRICK.MAIL **playlist** on IPBRICK YouTube channel.

Watch Video Presentation

iPortalDoc

iPortalDoc is a **Document and Process Management** system with **workflows,** that operates **On-premises** and in **Private Cloud.**

iPortalDoc

It's the only **Document Management** solution that integrates, natively, with a Unified Communications Center, that allows Calls, Emails and Chat Conversations to be recorded in the Document Management and to be associated to documents/processes to which they relate, being available for consultation at any time.

It is prepared to help all types of companies and institutions with the management of their work processes: **Correspondence, Financial, Human Resources, Commercial, Marketing, Legal and others.**
